

Keeping America on a Roll

# RUBBER & POLYURETHANE ENGINEERED FOR INDUSTRY.

Est. 1937 · Family-Owned · Three Generations · Memphis, TN

## WHO WE ARE

Arthur Rubber has been manufacturing precision rubber and polyurethane rolls, sleeves, and custom elastomeric components since 1937. Family-owned across three generations, we operate out of Memphis, TN — serving the flat rolled metals, steel processing, paint and galvanizing, and coil processing industries across North America. Every roll is built in-house by our team, with our own in-house chemist formulating compounds to exceed OEM specifications.

## CUSTOM COMPOUNDING

In-house chemist formulating rubber and polyurethane compounds to your exact application — hardness, chemical resistance, temperature range, and mechanical load. We don't sell off-the-shelf; we engineer to your line conditions.

## FULL PRODUCT LINE

Squeegee & wringer rolls, process rollers, paint line applicator rolls, uncoiler/recoiler sleeves, mandrel boots, and custom polyurethane components. One supplier for your entire elastomeric roll program.

## FAST TURNAROUND & REFURBISHMENT

In-house grinding, polishing, and refurbishment capabilities mean shorter lead times and less downtime. We get your rolls back to spec fast — so your line keeps running.

## INDUSTRIES SERVED

Flat rolled metals · Steel pickling & processing · Paint & galvanizing lines · Coil processing · Cold & hot mill operations · Custom industrial applications across North America.

### Est. 1937
